Approach

The Maturity Roadmap

Having worked with several Organisations in understanding their requirements and providing Solutions, Qlhc has developed a scientific approach for identifying the right tools to be deployed at appropriate points in time. We call it The Maturity Roadmap. This roadmap positions the relevant Solution based on a Gap Assessment.

Gap Assessment is a systematic process of Data Collection & Needs Evaluation in order to provide a timeline and commitment required. Hence Gap Assessment is naturally the first step of our engagement model.

This exercise is typically completed within two working days and the Roadmap is presented within a week. Qlhc has sector specific experts who will conduct a comprehensive assessment starting with a Sr. Management Review, Data Collection, Observation of Activities, Conducting Interviews with Functional Heads, compiling a Report and finally presenting the Roadmap. Get in touch with us for starting this exciting Journey.

BALANCED SCORECARD - TRANSLATING STRATEGY INTO ACTION

A Balanced Scorecard is a Comprehensive Strategic Planning & Performance Review mechanism which when effectively deployed facilitates in aligning the Operational Initiatives towards the Organisation's Vision & Goals

Robert S Kaplan, in one of his articles explains how to effectively manage Strategy and Operations. This wonderful work chalks out a **Five Stage System Deployment of the Balanced Scorecard**. Each of the stages has crystal clear deliverables, while connecting ends beautifully. Visionaries start with a loud bang, however many whimper down when they face operational barriers & conflicting short term goals. This leads to a Strategic Dilemma in forging ahead the Balanced Scorecard. The Strategic Dilemma occurs when Visionaries falter by moving ahead with an inadequate & opaque plan, thereby disturbing the apple cart and attracting ire of the executing teams. Operational Barriers do occur during the implementation. What is important is to be prepared with and activating the Mitigation plans. At Qltc we have the experience of Successful implementations across Industry. Over the years we have lived & overcome the hurdles that come along the way and take Organisations to a Sustainable Growth Trajectory.

MANAGEMENT SYSTEMS - INTEGRATED AND RISK BASED APPROACH

Organisations, irrespective of their size, type or the stage they are in, face multiple Internal and External challenges. These challenges, when not approached systematically, consumes Key Resources for dousing fires. This in turn leads to inefficiency, attention, diversion and thereby bringing uncertainty in achieving the Core Objectives, the very purpose an Organisation Exists. The effect of this uncertainty is the Risk the Organisation continues to carry, pulling it away from its Growth Trajectory.

Integrated and Risk Based Approach to Management Systems is the order of the day. A five Step Structured Methodology based on ISO 31000 Guidelines, starting with Establishing the Context of the Organisation (The Very Purpose it exists) to Identification, Assessment, Treatment & Review provides a comprehensive Assurance & Confidence in Addressing its Risks & converting Opportunities. The Team at Qltc has deployed the Standard Requirements in several Organisations with Comprehensive Documentation & Training, guiding them not only to- wards successful certification but imbibing the Standards Methodology as a way of life in their Businesses.

SAP BUSINESS ONE - THE ERP BACKBONE AS A DECISION SUPPORT SYSTEM

The very Purpose an Organisation considers ERP is to ease its Operations, in anticipation of releasing its resources from Mundane Repetitive Tasks and moving them to Value Added work. Unfortunately though at many times, this intent ends up as an Accounting System due to wrong choice of software & poor implementation. The Operations People tend to be pulled into a Post Mortem effort of regularising the Trans- actions. An Enterprise Resource Planning Tool or ERP as popularly called is a system that is expected to enable an Organisation to manage its Resources efficiently by maintaining an integral Database, Process Input Real Time Data, and Provide timely Information for Objective Decision Making through Trend Analysis & Reports.

SAP Business One does just that by being Affordable, Quick & Easy to Implement and at the same time being Comprehensive & Powerful. It is specifically designed for Small & Medium Enterprises across Business verticals providing a host of Features to manage their Key Businesses Processes like Master Data Management, Marketing to Opportunity, Order to Cash, Procure to Pay & Demand to Supply. Qltc is the right choice as your ERP Partner. Our Domain Knowledge in the Business Processes and Management Systems make us an enviable player in the Market.

OPERATIONAL EXCELLENCE - BENCHMARKING PERFORMANCE

Encyclopedia Britannica defines Philosophy as "the rational, abstract, and methodical consideration of reality as a whole or of fundamental dimensions of human existence and experience". An Organisational Philosophy is the similar with just the word Human replaced with Organisation. Operations Excellence is all about living up to this Philosophy

The Organisational Leadership has to encourage a paradigm shift from the run-of-the-mill work attitude towards Benchmarking Performance in every activity it's Team Members are engaged in. An Organisation has to reach a certain level of Maturity to deploy the Operational Excellence Tools. Over the Years, these Tools have evolved and are well tested for its purpose. However, the challenge lies in the identification of the right Tool and the Right Time for Deployment. Organisations rush to implement on an adhoc basis and loose steam quite early, ending this initiative prematurely or at most painfully drag due to Customer insistence. We help you to put together this Program in an Structured Order for Sustenance and Measurable Success. The Team at Qltc has expertise in conducting Operational Excellence Studies, Select the appropriate Tool, Prepare a Project Charter, Guide the Team Members and arrive at Root Cause with recommended Solutions. COMPETENCY & PROFICIENCY - THE RIGHT SKILLS TO DEVELOP PEOPLE

A formal education lays the foundation for an aspiring Student to orient herself or himself into the domain she or he wants to Develop and Excel. An Organisation sets its Vision and strives to Achieve its Goals for Economical & Sustainable Growth through its Core Business Processes like Sales and Operations

Both, the individual and the Organisation start on different paths to reach, however a common goal which is in essence Continual Improvement.

While the fundamental actions as above, do support the aspirations to an extent, it is the incremental knowledge gained along the way that differentiates from an ordinary performer to a Star Performer be it an Organisation or an Individual.

Recognising the challenges in Adult Learning, Qltc has developed an exclusive online portal for Skill Development. Specific and Customised Learning Modules are designed to guide in acquiring the required Competencies and develop Proficiency. Contact us to enroll for the Courses.
